Modern Web Architecture: RESTful Flask APIs & Frontend SPA De

BCA501 | StudyVault Academic Repository

StudyVault Digital Study Material - Department of Computer Science

Key Concepts & Highlights:

- Client-Server Architecture: HTTP request-response cycle and statelessness
- Flask Framework: Application structure, blueprints, request routing, and templating
- RESTful API Design: HTTP verbs (GET, POST, PUT, DELETE), status codes, and JSON payloads
- Database ORM vs Raw SQL queries with parameterized statements against SQL Injection
- Modern Frontend UI: CSS Grid, Flexbox, glassmorphic UI tokens, and asynchronous fetch()
