Computer Networks: OSI 7-Layer & TCP/IP Model Full Notes

CS401 | StudyVault Academic Repository

StudyVault Digital Study Material - Department of Computer Science

Key Concepts & Highlights:

- OSI Reference Model vs TCP/IP Protocol Suite mapping and protocol headers
- Data Link Layer: Sliding Window protocols (Go-Back-N, Selective Repeat) and CRC checksum
- Network Layer: IPv4 addressing, CIDR notation, Subnet masking, and IPv6 migration
- Transport Layer: UDP vs TCP, TCP 3-Way Handshake, Flow Control, and Congestion Control
- Application Layer: DNS resolution hierarchy, HTTP/1.1 vs HTTP/2 vs HTTP/3, SMTP, and SSH
