# AI & Machine Learning: Search Algorithms to Deep Neural Nets

CS504 | StudyVault Academic Repository

StudyVault Digital Study Material - Department of Computer Science

## Key Concepts & Highlights:

State Space Search: Breadth-First, Depth-First, and A* Heuristic Search

Adversarial Search: Minimax algorithm and Alpha-Beta Pruning with examples

Supervised Learning: Linear Regression, Logistic Regression, Decision Trees, and SVMs

Neural Networks: Multi-Layer Perceptrons, Activation Functions (ReLU, Softmax)

Backpropagation Algorithm and Gradient Descent Optimization
