Cloud Computing & AWS Architecture Study Blueprint

CS601 | StudyVault Academic Repository

StudyVault Digital Study Material - Department of Computer Science

Key Concepts & Highlights:

- Cloud Service Models: IaaS, PaaS, SaaS comparative analysis and security trade-offs
- AWS Core Infrastructure: VPC, Subnets, EC2 Instances, S3 Buckets, and IAM Roles
- Containerization: Dockerfile syntax, Image layers, and Container networking
- Kubernetes: Pods, Deployments, Services, Ingress, and ReplicaSets
- CI/CD Pipelines: GitHub Actions automation and automated cloud deployment
